

June 2017

Dear Students

Biology Field Course, Runswick Bay, North Yorkshire, Wednesday 28th June 2017

Final Details

Please could all students meet at the front of St Aidan's at 9:00am, to enable a prompt departure to Runswick Bay. We will be travelling by coach and return to St Aidan's for 5:15pm.

During the day we will be working along the shoreline collecting data for analysis in school and you will be assessed on appropriate skills which will contribute towards the practical endorsement for A Level Biology.

As the weather has been mixed in previous years, please keep an eye on the forecast for the day and make sure you come prepared. Appropriate clothing for the trip will be discussed in lessons, including waterproofs, suitable footwear, boots or wellies, and sunscreen. You will also be required to bring with you a packed lunch, snacks and drinks to last throughout the day.

Finally, if any specific medication, such as epipens or inhalers are needed, please can you ensure that these are brought on the day. Unfortunately students who do not bring medication that is stated on their school medical records will not be allowed to take part in the trip.

We look forward to a successful and enjoyable trip which will benefit your education. Please ask your Biology teacher if any further clarification about the field course is needed.

Yours faithfully

N Bulcock
Head of Biology at St John Fisher Catholic High School
