

Oxbridge and the Associated Sixth Form

Over the past decade the Associated Sixth Form has had considerable success in securing places at the universities of Oxford and Cambridge. We usually receive between 10 and 15 offers depending on the number of applicants. Here is a picture of our successful applicants from January 2019:

The Association is keen to support students in their Oxbridge applications. What do we offer? Each site has a dedicated Oxbridge Co-ordinator. This gives students a clear point of contact, someone who is readily available to offer advice and guidance. Dr Murray is the Oxbridge Co-ordinator at St Aidan's. The Careers Department also has a wealth of experience and expertise in Oxbridge applications and works closely with Dr Murray.

The process of applying should be thought of as running between January and December. In Year 12 students are encouraged to consider courses, universities and colleges. Speakers are invited into school and various talks are organised, such as the Area Information Evening in March. In late June / early July we organise visits to the Open Days. These two-night trips provide plenty of time to explore the universities, colleges and departments.

We begin the process of writing Personal Statements in June. This means students will be ready to complete their UCAS forms in early in September. These forms must reach Oxbridge by 15 October, so time is short in Year 13. The more preparation you can do for Oxbridge in Year 12 the better. Preparations then begin for the various Oxford tests. We also offer support for interviews – a workshop led by the universities and, later, individual mock interviews – before you hear whether or not you have been summoned (for an interview).

News of whether or not you have been made an offer will reach you in early January, although you will have to wait until results day in August to find out whether you have met your grades. If so, then you will be in good company and follow in the footsteps of the many students from the Association who have also made it to Oxbridge.

Feel free to contact Dr Murray at St Aidan's if you have any questions about Oxbridge.
